

Environmental Noise

Environmental noise issues can occur from any industry and from any number of sources. Novus understands how environmental noise is generated and how costly it can be to mitigate. This is why having a qualified acoustician that knows your facility and understands noise propagation and the potential impacts is critical to the success of a project and ongoing operations of industrial facilities. Novus is also knowledgeable in the application of practical, effective mitigation strategies for various issues. Novus first listens to understand your challenges and works with you to devise solutions.

We have the experience to understand your needs and the knowledge to meet them.

At Novus, our focus is on atmospheric sciences, noise and vibration. We use our knowledge to understand our client's needs and to develop feasible, working solutions, with the goal of harmonizing the built and natural environments. Our experts have decades of experience in dealing with related environmental assessments, land-use planning approval issues and building design, having provided guidance on projects in diverse areas encompassing both rural and urban developments.

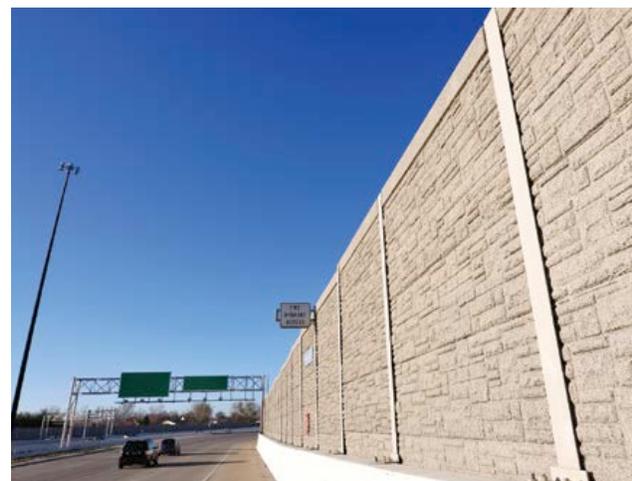

SERVICES:

- Ambient Surveys
- NIA Submissions
- Regulatory Compliance Assessments for: NEB, AUC, AER, BC OGC
- Environmental Impact Assessment

Environmental Noise Assessments

Whether your project is a small compressor station, an oil sands installation, an interprovincial pipeline or a gas plant, Novus has the expertise, experience and practical knowledge to provide a level of assessment that is appropriate to project size, scope and budget.

WHY NOVUS:

- A suite of numerical modelling tools in-house that provide the right solutions
- A roster of noise and vibration monitoring equipment; the right tools for the job
- Extensive experience working with industry, regulators and the public
- Qualified expert witnesses for hearings and public consultation

Successful projects require experienced consultants who collaborate closely with clients. Our team consists of experts that have worked on hundreds of projects assessing and providing solutions to environmental noise and vibration issues. We are committed to developing solutions that are best for you.
